WHITE SPRING

GRANITE

BRAZIL

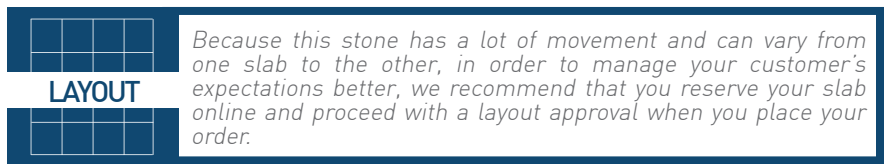

WHITE SPRING

Description

White Spring is extracted in Espirito Santo, Brazil, renowned for its beautiful beaches, coastal cuisine and sand dunes. With a white background and grey and burgundy veining, this granite has a beautiful soft personality. It is possible to see golden spots in this granite, which are a result of the oxidation process with a low amount of iron present in certain blocks. White Spring is recommended for a wide variety of interior applications.

In the course of the polishing process, an epoxy resin is applied to the stone's surface to fill part of its porosity (or pores) and natural cracks that may be apparent. This has no incident on the durability, the maintenance or the beauty of the natural stone. It is possible that certain pores are too small to contain efficiently the resin, and reopen during the finishing stages. However, this does not affect the stone's quality or beauty. Such as it is the case with many natural stones, it is recommended to apply a sealer to extend its beauty through time.

Available Finishes

- Polished 
- Honed 
- Antique 

Applications

- Counters
- Fireplace Contours
- Flooring
- Full-size backsplash
- Interior furniture
- Podium Bath Contours
