NEW VENETIAN GOLD

GRANITE

BRAZIL

NEW VENETIAN GOLD

Description

New Venetian Gold is extracted from a quarry in Espirito Santo, Brazil, renowned for its beautiful beaches, coastal cuisine and sand dunes. This granite features medium to large yellow crystals that can also appear light brown. Slight movement and veining is possible between slabs. New Venetian Gold is mostly beige with a golden complexion and slight veining in gorgeous deep reds, greys and browns, a tribute to the region's breathtaking sand dunes. Not only does Brazil offer its visitors a fascinating culture, its geodiversity enables it to create a stone such as New Venetian Gold that brings warmth and authenticity to those who are lucky enough to incorporate a parcel of this Brazilian jewel to their homes.

VARIATION **2**

LAYOUT

Because this stone has a lot of movement and can vary from one slab to the other, in order to manage your customer's expectations better, we recommend that you reserve your slab online and proceed with a layout approval when you place your order.
