TYPHOON BORDEAUX

GRANITE

BRAZIL

TYPHOON BORDEAUX

Description

Typhoon Bordeaux is extracted from a quarry in Brazil. For millions of years, water penetrated deep into the stone through hairline cracks, provoking oxidation. It is this process that has resulted in the richness of cream and burgundy colours visible in this stone, that procure a breathtaking effect worthy of a masterpiece for those who will incorporate this Brazilian jewel to their decor.

In the course of the polishing process, an epoxy resin is applied to the stone's surface to fill part of its porosity (or pores) and natural cracks that may be apparent. This has no incident on the durability, the maintenance or the beauty of the natural stone. It is possible that certain pores are too small to contain efficiently the resin, and reopen during the finishing stages. However, this does not affect the stone's quality or beauty. Such as it is the case with many natural stones, it is recommended to apply a sealer to extend its beauty through time.

Available Finishes

- Polished
Recommended
- Honed
- Antique

Three icons representing different finishes: a starburst for Polished, wavy lines for Honed, and a pattern of overlapping circles for Antique.

Applications

- Counters
- Fireplace Contours
- Flooring
- Full-size backsplash
- Interior furniture
- Podium Bath Contours
- Shower Base
- Sinks
- Walls

Characteristics

- Thawing Resistant
- Scratch Resistant

Stain Protection Recommended

Three icons: a snowflake for Thawing Resistant, a fork and knife for Scratch Resistant, and a starburst for Stain Protection.
